REUTLINGER

DESCRIPTION

Suspension Type 80 SV II M20 ring 193.009.004 for REUTLINGUER steel cable with a diameter of 6-8mm. Maximum load on galvanized steel cables (6mm-190kg/8mm-330kg). It has a safety nut with closure on the upper part to lock the steel cable and M20 male thread with M20 ring type coupler on the lower part of 72/40mm diameter. Black color. Very useful for supporting large loads in complete safety. Suitable solution for the events industry, interior and exterior architecture, stages, trade fair stands, etc. It stands out for its ease of mounting at height and great load capacity. TÜV Z1A certificate 06 04 14 229 029. The Type 80 SV II suspenders not only meet the requirements of the GS certificates, but also pass the rigorous mandatory tests of the German Institute for Safety and Accident Prevention. REUTLINGUER type 50 suspenders are the only ones that carry the BG-PRÜFZERT label, which is awarded only after passing demanding and rigorous tests with all imaginable load variants.
