The CE certification mark ("Certified Europe" or "Communauté Européenne") is proof of conformity with the "fundamental specifications" of relevant European standards.

For electronic items including products covered by the German devices and product safety law (GPSG). The VDE mark denotes conformity with the VDE specifications or European or internationally harmonized standards and confirms compliance with the safety requirements of the appropriate directives. The VDE mark denotes the safety of the product in respect of electrical, mechanical, thermal, toxic, radiological and other risks.

ENEC (European Norms Electrical Certification) European is a common certification mark for lamps and electrical components as provided for under the LUM agreement. It indicates norm conformity on products marked with European safety standards, in particular EN60598.
