WHY SWAROVSKI

EXCELLENCE, THROUGH INNOVATION AND ORIGIN

X-CUT

Advanced optical measurement and high-precision manufacturing deliver premium cuts characterized by unmatched brilliance.

HOTFIX GLUE

The variable temperatures at which Hotfix glue can be activated enable the application of crystals on a broad range of textiles.

PLATINUM PRO

With its new advanced foiling technique, Swarovski has set a new standard in the lifespan of crystals.

CRYSTALS – MADE IN AUSTRIA

The combination of innovation with sustainability and respect for individual wellbeing means that quality is always assured.

PREMIUM, BY SERVICE AND DESIGN

DESIGN SERVICE

Throughout its global network of Design Centers, Swarovski offers exceptional service provided by the industry's best creative talent.

GLOBAL SERVICE

Swarovski's Global Service Network provides customers with dedicated personal assistance on a local level.

APPLICATION SERVICE

A comprehensive range of application services means customers benefit from the extensive experience of leading international experts, as well as internal specialists.

DESIGNER EDITIONS

Creative collaborations with top designers result in exclusive cuts and unique designs for Swarovski crystal.

COMPLIANCE, WITH INTEGRITY

ADVANCED CRYSTAL

Swarovski's patented lead-free* formula has changed the DNA of crystal while still offering the same sparkle, dependability, and variety for which Swarovski is famous.

*Crystal glass and all other materials containing 0.009 % lead or less.

CLEAR

Regular legal monitoring of chemical requirements and reasonable testing provide customers with the comfort of trust in Swarovski's products.

OEKO-TEX

Oeko-Tex® Standard 100 Class II (direct contact with skin) certification creates confidence in chemical safety of textile applications.

TO PREDICT THE FUTURE, WE INVENTED IT.

Stay ahead with our Advanced Crystal. It is lead-free* and helps you to reach full compliance with current laws and regulations.

*Crystal glass and all other materials containing 0.009 % lead or less.

Extended Assortment

To provide even more assortment variety in color, effect and sizes, we now offer selected items as "Extended Assortment". For these items we guarantee availability for at least 12 months after launch date under regular ordering conditions (1 packing unit). "Extended Assortment" articles are marked with "□" within the respective product matrix. Please check on available quantities with our Customer Service or online via our e-Commerce Website WWW.B2B.ECOMMERCE.SWAROVSKI.COM. Additional product information can also be found on our Business Website WWW.SWAROVSKI.COM/PROFESSIONAL.

Unfoiled Articles

Within this brochure, you find an extended assortment of various unfoiled versions of existing articles, which will be available for at least 12 months after the launch date. Apart from these articles, every loose crystal that is available with foiling may also be ordered without foiling, regardless of product group.

Naturally this includes Fancy Stones, Round Stones, Sew-on Articles etc. Just place a special production order with a minimum quantity of five (5) packing units of each article variant. Delivery time is approximately four weeks.

Please note that special productions are subject to approx. 10% over- and undersupply. Lead times are confirmed by customer service. There is an added surcharge of 20% if the order value is below EUR 3,500.

Maison Martin Margiela for Swarovski

Crystalactite Pendants

Since 1988, Paris-based Maison Martin Margiela has become famous for its collaborative team-led approach and its avant-garde transformation of classic designs. In July 2013, it presented the *Maison Martin Margiela Crystalactite for Swarovski* at its Paris Haute Couture show. These were groundbreaking Crystal Fusion components inspired by natural stalactite forms and developed in creative partnership with Swarovski. Now Swarovski presents its interpretation of this innovative cut in pure crystal – the *Crystalactite Pendant*. Featuring a progressive aesthetic combining partly frosted facets with primeval, irregular icicle shapes, the vision that originated in our wildest landscapes has now been perfected by one of the most sophisticated design houses. Together with an easy-to-apply hole at the top, the Grand and Petite Pendants offer myriad design possibilities for strong, contemporary designs, and for recreating haute-couture looks.

“Naturally and spontaneously, an imposing crystal emerges from its raw, stony origin, patiently growing into its iconic stalactite shape.”

Round Stones

Art. 1088 XIRIUS Chaton Unfoiled Line Extension

The assortment of unfoiled Round Stones has been extended to include the art. 1088 XIRIUS Chaton as an unfoiled version in various colors. These crystals offer a perfect alternative to genuine gemstones in applications where the stone is visible from both sides, such as the prong setting. The color range includes the classic “big three” gemstone colors. This new assortment opens up countless opportunities for delicate, romantic, and timeless designs, further enhanced by Swarovski’s famous and unique sparkle.

These art. 1088 XIRIUS Chatons unfoiled are available as an “Extended Assortment” (status G6). We guarantee availability of these items for at least twelve months after the launch date (September 2013) under regular ordering conditions (one packing unit).

Application Advice

The Butterfly Flat Back Hotfix can be easily applied using a standard heat press. The use of an ultrasonic device for single stone setting is not possible. The application parameters are the same as those that apply to Creation Transfers Plus. These items are not suitable for application from the front.

For detailed information, please refer to the Application Manual and our business website (closed area) WWW.SWAROVSKI.COM/PROFESSIONAL.

Care Instructions

The care instructions for the Butterfly Flat Back Hotfix are the same as those that apply to the Creation Stones Plus. For detailed information, please refer to the Application Manual and our business website (closed area) WWW.SWAROVSKI.COM/PROFESSIONAL.

* For details please refer to page 15, chapter "Extended Assortment".

Application Advice

Bow Tie Sew-on Stones can be applied by hand or using a domestic or industrial sewing machine. When sewing Bow Tie Sew-on Stones, synthetic multifilament threads with a thread count of Nm 80 are most suitable due to their abrasion resistance. Monofilament and pure cotton yarns are not recommended due to their limited abrasion resistance. Please make sure that the transport system is deactivated to avoid any movement of the fabric. After selecting the over edge stitch, the length and width of the stitch must be adjusted to suit the element being applied. Due to the height of the article, using a program for sewing on buttons is not possible and it can only be applied without a standard presser foot.

Care Instructions

The care instructions are the same as those that apply to the Sew-on Stones assortment. Please refer to the Application Manual and our business website (closed area) WWW.SWAROVSKI.COM/PROFESSIONAL for detailed information.

Crystaltex New Effects and Black Synthetic Carrier Material

The assortment of Crystaltex and Crystaltex Chaton has been extended to include the stunning Crystal Iridescent Green effect. Crystaltex also glimmers in the luxurious and precious Crystal Rose Gold effect with its 18 carat rose gold finish, and Crystal Luminous Green. In addition to the new effects, black synthetic carrier material can be offered for Crystaltex and Crystaltex Chaton to open up completely new design possibilities.

Application Advice

Crystal Buttons can be applied by hand or using a domestic or industrial sewing machine.

When sewing Crystal Buttons, synthetic multifilament threads with a thread count of Nm 80 are most suitable due to their abrasion resistance. Monofilament and pure cotton yarns are not recommended due to their limited abrasion resistance.

Please make sure that the transport system is deactivated to avoid any movement of the fabric.

After selecting the over edge stitch, the length and width of the stitch must be adjusted to suit the element being applied. Due to the height of the article, using a program for sewing on buttons is not possible and it can only be applied without a standard presser foot.

Care Instructions

The care instructions are the same as those that apply to the Crystal Buttons assortment. Please refer to the Application Manual and our business website (closed area) WWW.SWAROVSKI.COM/PROFESSIONAL for detailed information.

Application Advice

The Crystal Stud can be easily applied to various materials using a fly press. Please consider the material thickness.

CRYSTAL STUD	SIZE	MATERIAL THICKNESS*
53 730	8 mm	min. 0.5 mm up to 4.0 mm
53 731	6 mm	min. 0.5 mm up to 2.5 mm

* Could vary due to character and production of carrier materials.

It is very important to carefully check the thickness of the fabric before beginning the application process. To avoid contraction or crinkling of the material after application, fabric sample tests are highly recommended before going ahead with the actual application process. In order to prevent possible injury, the wearing of protective eyewear is recommended when mechanically applying crystal products.

Tools for the Fly Press

The following tools are needed for the application of Crystal Studs:

	53 730 8 mm 	53 731 6 mm 
UPPER DIE	Art. 9040/120 	
LOWER DIE	Art. 9040/121 	

Stop position: the offset can be regulated using an adjustable stop that is fastened to the handle.
A vacuum pump enables easy intake and application of the Crystal Stud. In the upper die the vacuum adapter is already integrated. Therefore, an additional adapter is not needed.

The **buttonhole punching tool** (Art. 9040/122) can be used to create the buttonhole.

Application

Pre-punch the carrier material on the position designated for the Crystal Stud to create a hole with a diameter of 2.0 mm.

Place the tools in the fly press. Make sure that they are straight and secure.

Connect the vacuum pump and turn it on.

Place the lower part of the Crystal Stud in the lower die.

Place the upper part in the upper die (crystal pointing upward).

Put the carrier material with the pre-punched hole over the lower part.

Apply the Crystal Stud by closing the handle.

The Crystal Stud is now applied.

Create the buttonhole with the suggested buttonhole punching tool (Art. 9040/122).

The latch can now be closed.

Please refer to the Application Manual and our business website (closed area) WWW.SWAROVSKI.COM/PROFESSIONAL for detailed application information.

40 701 Crystal Mesh Banding

Crystal Mesh Banding is designed using a Swarovski favorite, Crystal Mesh Standard, and introduces a new combination of materials. The base of the banding is made from Alcantara®, a high-tech luxury material made in Italy and certified as carbon neutral that is widely used in the fashion and accessories industry.

General Warning

Loose crystals may present a small parts hazard to young children, particularly children under three years old. Depending on the size of the crystal and any attached material (such as glue, fabric, etc.), children may choke on, inhale, swallow, or insert the crystal into their noses. Magnetic products with crystal applications pose a particular risk of serious intestinal injury if ingested. The application techniques as stated in the Application Manual do not guarantee that crystals will not come loose. For each application, the manufacturer must determine whether the product meets the relevant requirements related to small parts hazards and assess any risk it may pose to small children. Failure to follow Swarovski's care instructions may result in damage to the crystal, which could pose a risk of laceration or other harm.

Warning for Crystal Tattoos

Crystal Tattoos may be applied on healthy skin only. Do not adhere to eyes or on mucous membranes. Crystal Tattoos are not recommended for young children. Loose crystals may present a small parts hazard to young children, particularly children under three years old. If a crystal comes loose, depending on the size of the crystal, children may choke on, inhale, swallow, or insert the crystal into their noses.

Warning for Tableware

Application of loose crystals to tableware presents a potential risk of aspiration, choking, swallowing, or tooth damage should crystals become loose. To reduce this risk, crystals should never be applied to any surface of tableware likely to come in contact with food or the mouth, and crystals should never be placed on any tableware intended for use by children. Tableware with crystals intended for decorative use only should be marked as such. To avoid dishwasher damage, tableware decorated with crystals should be washed by hand. The application techniques or suggestions in this manual do not guarantee that crystals will not come loose. For each application, the manufacturer must determine whether the product meets relevant requirements related to small parts hazards or use in food contact items and assess any risk it may pose to users.

The use of crystals (which may contain restricted substances deemed hazardous under local laws) and adhesives on tableware is subject to legal restrictions in specific countries. The customer is fully responsible to comply with these country-specific provisions and shall defend, indemnify, and hold Swarovski harmless from any and all third-party claims based on product liability or otherwise relating to uses of Swarovski products and waives all its own claims against Swarovski.

Notice for Application on Packaging

The use of crystal that may contain substances like lead, cadmium or hexavalent chromium, on packaging is subject to legal restrictions in specific countries, including but not limited in regard to the total content of substances based on the proportion between crystal mass to the remaining weight of packaging. The customer is fully responsible to comply with these country-specific provisions and to pass on this information to his customers.

Care Instructions

Failure to follow Swarovski's care instruction may result in damage to the Swarovski product, which could pose a risk of laceration or other harm. Please be informed that all conventional laundering processes (household washing machine as well as professional dry-cleaning) have a considerable mechanical influence onto the garment, which is based on the rotation of the washing drum. The essential requirement for a safety laundering process is that the Swarovski products are properly applied without restrictions regarding the adherence of the Swarovski products. The bigger the size of the used Swarovski product is and the more Swarovski products are applied next to each other, the more a risk of damage has to be taken into consideration. Swarovski products are made of or incorporate crystal and therefore must be handled with due care! Generally, to best protect the Swarovski products from breaking we recommend the use of a soft washing bag and to fill up the washing drum. Turning inside out before washing and selection of a gentle washing program, plus the use of mild detergents are important prerequisites to safeguard the quality of our Swarovski products. Our care instructions based on DIN EN ISO 3758 list up all Swarovski product groups as overview so that each used Swarovski product still needs to be judged in terms of its cleaning suitability for the intended purpose and finished product by the customer. Swarovski's recommendations are given according to the current state of our knowledge and Swarovski's determination of the qualification as textile application product. The customer is therefore fully responsible to determine the cleaning process applicable to the finished product, taking the Swarovski care instructions as well as those of third party materials into account. The variety of shape, cut, surface effect, size and application weight respectively amount of used Swarovski products are decisive for the determination of the suitable cleaning process. To be entirely safe customers respectively dry-cleaners usually take off Sew-on Stones, Buttons, etc. of bigger size before cleaning and re-apply them afterwards.

Unsuitable Applications

Crystals from Swarovski are intended for use in the fields of fashion, jewelry, accessories, textile products, and for interior décor. Due to their physical properties, crystals from Swarovski are unsuitable for other uses (e.g. gluing onto teeth, using crystals on or near mucous membranes, and other unsafe uses). The customer shall defend, indemnify and hold Swarovski harmless from any and all third-party claims based on product liability or otherwise relating to uses of Swarovski products purchased by the customer, and waives all its own claims.

Responsibility of User

Any oral, written, or test-based advice that Swarovski provides regarding techniques for application of its products are recommendations based on Swarovski's current knowledge and the information provided by its suppliers. Such advice does not discharge the customer from carrying out its own tests of techniques it proposes to use and their suitability for the intended application. The application, use, and processing of these techniques and products are solely the user's responsibility.
