

SWAROVSKI

INNOVATIONS
FALL/WINTER
2014/15

Treasure Trove

Be mesmerized by the magnificent new shapes and shades of Swarovski's innovations for Fall/Winter 2014/15 – sparkling treasures that enrich any design.

NEW EFFECT
CRYSTAL LILAC SHADOW

A deep purple with an exciting hint of gold – a standout shade unique to Swarovski – Crystal Lilac Shadow both enriches and gives an air of mystery to any design.

NEW COLOR
DARK MOSS GREEN

Mimicking the most precious material nature offers, genuine gemstones, Dark Moss Green is a must for current ecology-aware trends, lending a touch of luxury.

DOME BEAD

This shape marks the spike in Swarovski's development of fashion related components. The Dome Bead is the answer to calls for more elegance than rock, yet more rock than sheer.

SOLARIS FAMILY
FANCY STONE & FLAT BACK
The versatile Solaris Family
has a natural form everyone
intuitively recognizes as well as
the symmetry we all strive for.

CLOVER PENDANT

Everybody needs good luck – and everybody knows how to find it: in the shape of a four-leaf clover. The symbol of the Clover Pendant is universal and international, and, thanks to Swarovski, it is a masterpiece of 3D facets. A feel-good component if there ever was one.

SWEET HEART FANCY STONE

A true classic returns! Countless designers have already fallen in love with the heart shape, making it an unrivalled best-seller. The Sweet Heart Fancy Stone will surely rekindle the flames of this sparkling relationship.

TRILLIANT FANCY STONE

With the Trilliant Fancy Stone, every design exudes noblesse. Its cut sparkles with such grandeur that, despite being a newcomer to the collection, it evokes the treasures of kingdoms past.

WHY SWAROVSKI

Swarovski is the premium brand for the finest crystals. For more than 100 years, the company has been recognized for its pioneering spirit, its collaborations with designers, and its responsible behavior. In its continuous effort to strive for excellence and the highest standards of customer service, Swarovski has created a comprehensive product and service offering that delivers distinctive values to its customers.

EXCELLENCE, THROUGH INNOVATION AND ORIGIN

X-CUT

Advanced optical measurement and high-precision manufacturing deliver premium cuts characterized by unmatched brilliance.

PLATINUM PRO

With its new advanced foiling technique, Swarovski has set a new standard in the lifespan of crystals.

HOTFIX GLUE

The variable temperatures at which Hotfix glue can be activated enable the application of crystals on a broad range of textiles.

CRYSTALS – MADE IN AUSTRIA

The combination of innovation with sustainability and respect for individual wellbeing means that quality is always assured.

PREMIUM, BY SERVICE AND DESIGN

DESIGN SERVICE

Throughout its global network of Design Centers, Swarovski offers exceptional service provided by the industry's best creative talent.

APPLICATION SERVICE

A comprehensive range of application services means customers benefit from the extensive experience of leading international experts, as well as internal specialists.

GLOBAL SERVICE

Swarovski's Global Service Network provides customers with dedicated personal assistance on a local level.

DESIGNER EDITIONS

Creative collaborations with top designers result in exclusive cuts and unique designs for Swarovski crystal.

COMPLIANCE, WITH INTEGRITY

ADVANCED CRYSTAL

Swarovski's patented lead-free* formula has changed the DNA of crystal while still offering the same sparkle, dependability, and variety for which Swarovski is famous.

*Crystal glass and all other materials containing 0.009% lead or less.

OEKO-TEX

Oeko-Tex® Standard 100 Class II (direct contact with skin) certification creates confidence in chemical safety of textile applications.

CLEAR

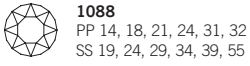

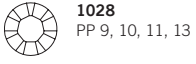

Regular legal monitoring of chemical requirements and reasonable testing provide customers with the comfort of trust in Swarovski's products.

Extended Assortment

To provide even more assortment variety in color, effect and sizes, we now offer selected items as “Extended Assortment”. For these items we guarantee availability for at least 12 months after launch date under regular ordering conditions (1 packing unit). “Extended Assortment” articles are marked with “□” within the respective product matrix. Please check on available quantities with our Customer Service or online via our e-Commerce Website WWW.B2B.ECOMMERCE.SWAROVSKI.COM. Additional product information can also be found on our Business Website WWW.SWAROVSKI.COM/PROFESSIONAL.

Unfoiled Articles

Within this brochure, you find an extended assortment of various unfoiled versions of existing articles, which will be available for at least 12 months after the launch date. Apart from these articles, every loose crystal that is available with foiling may also be ordered without foiling, regardless of product group.

Naturally this includes Fancy Stones, Round Stones, Sew-on Articles etc. Just place a special production order with a minimum quantity of five (5) packing units of each article variant. Delivery time is approximately four weeks.

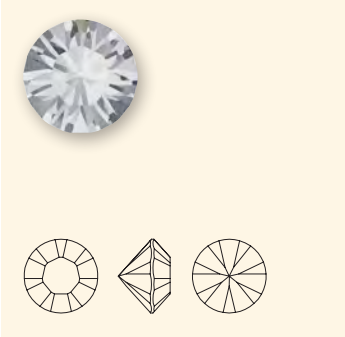

Please note that special productions are subject to approx. 10% over- and undersupply. Lead times are confirmed by customer service. There is an added surcharge of 20% if the order value is below EUR 3,500.

Article Transition

Extended Assortment - Article Transition

As explained in the "Extended Assortment" overview on page 15, specific articles are guaranteed to be available for at least 12 month following the official launch. After this time period, selected articles will either be transferred to "standard" (marked with "■") or "special production" articles (marked with "■"). Please refer to the respective product and its matrix to check the new status of all available variants.

Beads

Full Coating

New coating technologies make it possible to perfectly apply Swarovski's unique crystal effects on Beads. Coming in bright metallic styles, the new Full Coating (FC) will ensure any jewelry piece makes an electrifying statement in both cool and classic ways.

Key features:

Improved technology creates perfectly homogeneous, all-round application of high-intensity metallic effects.

- Effects featured on CRYSTAL: AB, API, BRSH, CAL, METBL, JET HEM
- Effects featured on COLOR: AB

Advice on Application

When gluing Crystal Rocks-it and Crystal Fine Rocks-it, the surface to be glued must comply with the general requirements for gluing, i.e. it must be clean, dry, and free of oil and grease. Before processing we recommend measuring the tension of the surface with a Test Pen (available from Swarovski, art. 9030/000). A surface tension of at least 38 mN/m is recommended for gluing. If the surface tension is below this value, pre-treatment methods have to be executed.

Crystal Fine Rocks-it and Crystal Rocks-it can be also applied onto a wide range of solid materials by creating a cavity. The cavity enables the motif to be easily positioned and ensures a higher protection of the crystal against mechanical and chemical stress. These cavities can be produced by milling (e.g. with CNC machines). For detailed information on tolerances please contact your Swarovski sales office. After the application, it takes around 72 hours until the final adhesive strength is reached. During this time, mechanical stress should be avoided.

Please note: Crystal Rocks-it and Crystal Fine Rocks-it are not products that are suitable for applying on sharp angles and edges.

Please refer to the Application Manual and our Business Website WWW.SWAROVSKI.COM/PROFESSIONAL for detailed information on the application.

Advice on Application

The Heart Crystal Button can be applied by hand or by using a domestic or industrial sewing machine. When sewing the Heart Crystal Button, synthetic multifilament threads with a thread count of Nm 80 are most suitable because of their level of resistance to abrasion. Monofilament and pure cotton yarns are not recommended because of their limited abrasion resistance.

Please make sure that the transport system is deactivated to avoid any movement of the fabric. After selecting the over edge stitch, the length and width of the stitch must be adjusted to suit the element being applied. The height of the article prevents the use of a program for sewing on buttons. They can only be applied without using a standard presser foot.

Care Instructions

The care instructions are the same as those that apply to the Crystal Button assortment. Please refer to the Application Manual and our Business Website WWW.SWAROVSKI.COM/PROFESSIONAL for detailed information.

Brilliant Zipper Relaunch

Sparkling zippers by Swarovski have already been a wardrobe highlight for many years. Now the Brilliant Zipper is celebrating a spectacular relaunch following a collaboration with YKK, the world's leading zipper specialist. YKK not only guarantees outstanding quality—the popular Brilliant Zipper has also been given its own color chart and is now available in an almost endless variety of shades.

Easy to use, high impact, durable, glamorous, and colorful - the Brilliant Zipper has all it takes to be both practical and stylish.

Special Productions

In addition to the Brilliant Zipper standard assortment, customers can choose from all available colors in the loose XIRIUS Chaton assortment (PP 24) and can combine them with tone-on-tone carrier material. They also have the possibility to create an individual color combination of fabric, acryl and crystal for the zipper. Customers can choose between 600 different fabric and acryl colors from the YKK Color Card provided by their sales representative.

The minimum order quantity for special productions is 180 pcs.

| <input type="checkbox"/> | Peridot (214) |
| <input type="checkbox"/> | Topaz (203) |

Advice on Application

The Chessboard Pin can be easily applied to various materials using a fly press. Please consider the material thickness Chessboard Pins can be applied to.

CHESSBOARD PIN	SIZE	MATERIAL THICKNESS*
53 310	6 mm	1.0 – 2.0 mm
53 311	10 mm	

* Can vary due to character and production of carrier materials

It is very important to carefully check the thickness of the fabric before beginning the application process. Tests are highly recommended on fabric samples before going ahead with the actual application process. This will avoid contraction or crinkling of the material during or after the application.

In order to prevent possible injury, the wearing of protective eyewear is recommended when mechanically applying crystal products.

Tools for fly press

A vacuum pump and a vacuum adapter (art. 9040/105) enable an easy intake and application of the Chessboard Pin.

Vacuum adapter with external screw instead of thread to fix the upper die. Art. 9040/105

The upper die can be fixed to the vacuum adapter with an external screw instead of a thread to allow it to be rotated (360°). This ensures an easy and flexible positioning of the Chessboard Pin. Upper dies with M6 or M8 threads are therefore not available.

	53 310 6 mm	53 311 10 mm
UPPER DIE	Art. 9040/114 	Art. 9040/115
SPARE PART*	Art. 9040/117 	Art. 9040/118
LOWER DIE	Art. 9070/019 	Art. 9070/020

* The spare part is integrated into the upper die as standard. This should be replaced when it becomes worn.

It is important to make sure that the tool is sitting straight and firmly in the fly press. Stop position: the offset can be regulated using an adjustable stop that is fastened to the handle.

Please refer to the Application Manual and our Business Website WWW.SWAROVSKI.COM/PROFESSIONAL for detailed information on the application.

Care Instructions

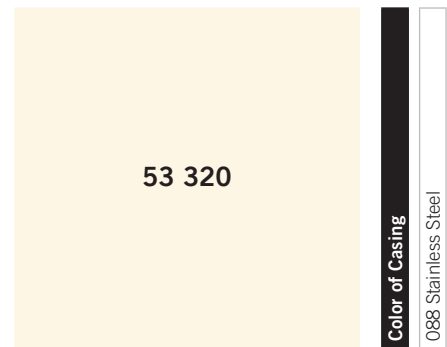

GENERAL RECOMMENDATIONS	Turn inside out, choose a gentle wash cycle and use a mild laundry detergent. To protect the crystals as much as possible, the use of a soft wash bag is recommended.	Do not use chlorine bleach!	Do not tumble dry!	Do not iron!	The textile can be gently dry-cleaned using perchlorethylene. Turn inside out.	The textile can be gently dry-cleaned using hydrocarbon. Turn inside out.	The textile will withstand gentle professional wet-cleaning. Turn inside out.
				Do not iron directly over the crystals.	To protect the crystals as much as possible, the use of a soft wash bag is recommended.

	Light Rose (223)
	Light Siam (227)

Advice on Application

The Rhombus Pin can be easily applied to various materials using a fly press. Please consider the material thickness Rhombus Pin can be applied to.

RHOMBUS PIN	SIZE	MATERIAL THICKNESS*
53 320	10x6 mm	1.0 – 2.0 mm

* Can vary due to character and production of carrier materials

It is very important to carefully check the thickness of the fabric before beginning the application process. Tests are highly recommended on fabric samples before going ahead with the actual application process. This will avoid contraction or crinkling of the material during and after the application.

In order to prevent possible injury, the wearing of protective eyewear is recommended when mechanically applying crystal products.

Tools for fly press

A vacuum pump and a vacuum adapter (art. 9040/105) enable an easy intake and application of the Rhombus Pin.

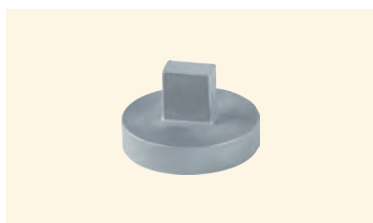

Vacuum adapter with external screw instead of thread to fix the upper die. Art. 9040/105

The upper die can be fixed to the vacuum adapter with an external screw instead of a thread to allow it to be rotated (360°). This ensures an easy and flexible positioning of the Rhombus Pin. Upper dies with M6 or M8 threads are therefore not available.

	53 320 
UPPER DIE	Art. 9040/116 
SPARE PART*	Art. 9040/119 
LOWER DIE	Art. 9070/021 

* The spare part is integrated into the upper die as standard. This should be replaced when it becomes worn.

The **centering aid** for Rhombus Pin art. 53 320 (10x6 mm), art. 9070/022, allows the product to be easily positioned in the upper die.

It is important to make sure that the tool is sitting straight and firmly in the fly press. Stop position: the offset can be regulated using an adjustable stop that is fastened to the handle.

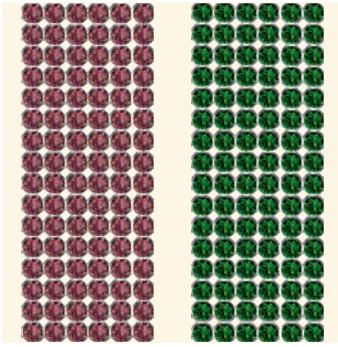

Please refer to the Application Manual and our Business Website WWW.SWAROVSKI.COM/PROFESSIONAL for detailed information on the application.

27 001 Catch-free Cupchain

Maintaining all the allure of Swarovski Cupchains, this innovation benefits from an additional protective feature. The prong setting has been replaced by an intelligent, arch-shaped setting to protect even the most delicate fabrics from tearing.

27 001 Catch-free Cupchain ^{New!}

General Warning

Loose crystals may present a small parts hazard to young children, particularly children under three years old. Depending on the size of the crystal and any attached material (such as glue, fabric, etc.), children may choke on, inhale, swallow, or insert the crystal into their noses. Magnetic products with crystal applications pose a particular risk of serious intestinal injury if ingested. The application techniques as stated in the Application Manual do not guarantee that crystals will not come loose. For each application, the manufacturer must determine whether the product meets the relevant requirements related to small parts hazards and assess any risk it may pose to small children. Failure to follow Swarovski's care instructions may result in damage to the crystal, which could pose a risk of laceration or other harm.

Warning for Crystal Tattoos

Crystal Tattoos may be applied on healthy skin only. Do not adhere to eyes or on mucous membranes. Crystal Tattoos are not recommended for young children. Loose crystals may present a small parts hazard to young children, particularly children under three years old. If a crystal comes loose, depending on the size of the crystal, children may choke on, inhale, swallow, or insert the crystal into their noses.

Warning for Tableware

Application of loose crystals to tableware presents a potential risk of aspiration, choking, swallowing, or tooth damage should crystals become loose. To reduce this risk, crystals should never be applied to any surface of tableware likely to come in contact with food or the mouth, and crystals should never be placed on any tableware intended for use by children. Tableware with crystals intended for decorative use only should be marked as such. To avoid dishwasher damage, tableware decorated with crystals should be washed by hand. The application techniques or suggestions in this manual do not guarantee that crystals will not come loose. For each application, the manufacturer must determine whether the product meets relevant requirements related to small parts hazards or use in food contact items and assess any risk it may pose to users. The use of crystals (which may contain restricted substances deemed hazardous under local laws) and adhesives on tableware is subject to legal restrictions in specific countries. The customer is fully responsible to comply with these country-specific provisions and shall defend, indemnify, and hold Swarovski harmless from any and all third-party claims based on product liability or otherwise relating to uses of Swarovski products and waives all its own claims against Swarovski.

Notice for Application on Packaging

The use of crystal that may contain substances like lead, cadmium or hexavalent chromium, on packaging is subject to legal restrictions in specific countries, including but not limited in regard to the total content of substances based on the proportion between crystal mass to the remaining weight of packaging. The customer is fully responsible to comply with these country-specific provisions and to pass on this information to his customers.

Care Instructions

Failure to follow Swarovski's care instruction may result in damage to the Swarovski product, which could pose a risk of laceration or other harm. Please be informed that all conventional laundering processes (household washing machine as well as professional dry-cleaning) have a considerable mechanical influence onto the garment, which is based on the rotation of the washing drum. The essential requirement for a safety laundering process is that the Swarovski products are proper applied without restrictions regarding the adherence of the Swarovski products. The bigger the size of the used Swarovski product is and the more Swarovski products are applied next to each other, the more a risk of damage has to be taken into consideration. Swarovski products are made of or incorporate crystal and therefore must be handled with due care! Generally, to best protect the Swarovski products from breaking we recommend the use of a soft washing bag and to fill up the washing drum. Turning inside out before washing and selection of a gentle washing program, plus the use of mild detergents are important prerequisites to safeguard the quality of our Swarovski products. Our care instructions based on DIN EN ISO 3758 list up all Swarovski product groups as overview so that each used Swarovski product still needs to be judged in terms of its cleaning suitability for the intended purpose and finished product by the customer. Swarovski's recommendations are given according to the current state of our knowledge and Swarovski's determination of the qualification as textile application product. The customer is therefore fully responsible to determine the cleaning process applicable to the finished product, taking the Swarovski care instructions as well as those of third party materials into account. The variety of shape, cut, surface effect, size and application weight respectively amount of used Swarovski products are decisive for the determination of the suitable cleaning process. To be entirely safe customers respectively dry-cleaners usually take off Sew-on Stones, Buttons, etc. of bigger size before cleaning and re-apply them afterwards.

Unsuitable Applications

Crystals from Swarovski are intended for use in the fields of fashion, jewelry, accessories, textile products, and for interior décor. Due to their physical properties, Crystals from Swarovski are unsuitable for other uses (e.g. gluing onto teeth, using crystals on or near mucous membranes, and other unsafe uses). The customer shall defend, indemnify and hold Swarovski harmless from any and all third-party claims based on product liability or otherwise relating to uses of Swarovski products purchased by the customer, and waives all its own claims.

Responsibility of User

Any oral, written, or test-based advice that Swarovski provides regarding techniques for application of its products are recommendations based on Swarovski's current knowledge and the information provided by its suppliers. Such advice does not discharge the customer from carrying out its own tests of techniques it proposes to use and their suitability for the intended application. The application, use, and processing of these techniques and products are solely the user's responsibility.
